Comment:

a. The new subdivision of Czechoslovakia into military subdistricts corresponds with that of civil administrative districts.\* The military subdistrict headquarters are believed to be military administration agencies controlling recruiting, replacement and administrative affairs of military posts.

b. The alleged disbanding of the corps was repeatedly reported [redacted] but was not definitely confirmed. Another report still listed all previously known corps. \*\* A newspaper of July 1949 published an article in which General MARKUS was mentioned as having attended a military celebration in TRNAVA, area of TRENCIN. It was concluded that General MARKUS was still CG of the V Corps, TRENCIN, at that time.
